DAVID J HAWKINS

Overall Career Objectives

Since I first started using computers I found my passion in CGI, using programs like 3DS MAX R3. Unfortunately this career path wasn't something I ended up pursuing for life reasons, instead I continue it as a passion in my spare time.

My ability to understand, build and use computers meant a career in some area of IT was something I wanted to pursue, which I have and will continue to do.

Education

2018 -

MCSA: Windows Server 2016

Currently working on obtaining this.

Interests & Hobbies

I have a multitude of interests and hobbies, my main passion being Sim Racing.

I am a big fan of motor racing, so naturally mixing computers and racing was a given.

I also enjoy CGI and graphic design, using the Adobe Suite or Blender to design logos and images, I also like to create videos of my racing to post to Social Media.

Building computers, retro arcades, gaming, camping,
